

THE FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE

(OFFICE OF SEMS DEAN)

FIELD TRIP

Dear Parent/Guardian,

2020/2021 STUDENT'S LONG VACATION FIELD WORK PROGRAMME

We send warmest greetings from the department of Remote Sensing and GIS, The Federal University of Technology, Akure. The Department runs a fieldwork course for 300 level students of the above named Department at the end of second semester every year. This is part of the requirement for graduation. This course normally last for continuous period of four weeks. During this exercise, students will be camped in selected part of Southwestern Nigeria learning and practicing the techniques of GIS acquisition and interpretation.

The 2023 edition of the programme will start on May 15th, 2023. Your ward having registered for the course is qualified and expected to take part in the programme. The following are the minimum and compulsory personal effects/items that every participating student must possess before being allowed to take part in the exercise

1. A compass/clinometer
2. A pair of boot
3. Good field attire
4. Portable mattress
5. A GPS device
6. Binoculars
7. Computer software's
8. Feeding for 30 days, twice per day
9. 18 x 12 inches flat board
10. Treated mosquito net
11. Digital Camera

We appreciate, in anticipation, your support towards the success of these field work outings.
Thank you.
